

Celebrate Waste Reduction Week 2016

A twist on #GreatTasteLessWaste: Compost Compote

Directions

Not everybody has access to a backyard composter. Here is a wonderful idea to use those kitchen scraps in an odourless, pest-less, nutrition in!, compote for your house plants.

- Blend kitchen scraps with water in a food processor or blender.
- Poke a hole in the soil of your house plant and pour in some compote. Close the hole, topping with more soil.

Watch your house plants bloom with this extra nutrition!

For more information on how you can help to get Northumberland County to the goal of 75% waste diversion, visit www.NorthumberlandCounty.ca/MakeLessWaste.
